

**Unlocking the
true potential of
solar shading**

**For the benefit of clients, the environment
and the solar shading industry**

WARNING!

Some building modelling systems do not show the benefits of solar shading

Modelling

A leading software significantly understates actual overheating. Simulations show shading offers no real overheating reduction.

Internal Shading

25.4°C

No Shading

27°C

External Shading

25.1°C

Reality

Serious overheating issue. Shading has significant benefit.

Internal Shading

34.5°C

No Shading

47.5°C

External Shading

29.5°C

Support the campaign and help build better buildings.

Come to the ES-SO seminar in the Atrium on 1 March 9.30 to 12.30
