

PRICING for WHAT: Measurement of hemispheric transmission, diffuse transmission and one reflexion

For orders with 10 samples or less: 220 EUR per sample (reduction of 4% per sample)

° For orders with more than 10 samples: 200 EUR from the first sample (reduction of 13%), this at two conditions:

-The reduction must be claimed by the **ES-SO member company** itself before the order form is signed;

-All samples must be sent in **one batch** otherwise will be considered as separate orders

Furthermore:

° There is a fixed price per order of 200 EUR (independently of the number of samples)

° If reflexion on both sides is required, there is an additional cost of 55 EUR/sample”.

NOTE:

Circumstances which may affect this reduction are the following:

BBRI annual price revision (indexation); in case of changes to the EN14500; in case new measurement equipment has to be bought.

CSTC is also offering services such as emissivity of materials; measure the UV, calculations.
